

# Mathematics Learning Journey

**YEAR 11**

**YEAR 10**

**YEAR 9**

**YEAR 8**

**YEAR 7**

Can you find the volume of a football?

Can you transform a function?

Have you discovered the Astor fish?

Can you find the area of any triangle?

How useful are surds?

How do you complete the square?

Can you expand three binomials?

What is a Box and Whisker diagram?

Congruent or similar?

Where do two lines cross?

Ever wondered about trigonometry?

Are you using bearings to get through life?

Start your journey into right angle triangles

Can you divide into ratios?

How can we represent and analyse data?

When do we use an estimated mean?

Can you find the surface area?

What are the connections in a graph?

Can you perform all four transformations?

What can you represent in a graph?

What is a probability tree?

Can you find the volume of a football?

Where do two lines cross?

Discover the use of Venn diagrams

Ever wondered about trigonometry?

Can you find the volume of a prism?

Start your journey into right angle triangles

Have you discovered the Astor fish?

Can you create a mathematical expression?

Discover when a goat is relevant in Maths?

When do you need error intervals?

When do we use multipliers?

Do you know your angle properties?

Can you find the nth term of a sequence?

Do you know the difference between expand and factorise?

Can you calculate with probability?

What is an enlargement?

Can you work with all four operations?

Can you write in standard form like a scientist?

Do you know the rules in parallel lines?

What are interest rates?

How do you form equations?

Can you draw or describe an enlargement?

Can you draw a graph?

How do you find HCF and LCM?

What do you know about angles in regular polygons?

Can you link finance and percentages??

Which equations can you solve?

Have you lost your bearings?

What is a gradient?

What comparisons can you make using data?

What is the nth term of a sequence?

Are you going too fast? How do you know?

What is substitution?

Can you expand?

How does Pi link to circles?

What is the order of operations?

How confident are you with negative numbers?

How do you find HCF and LCM?

What is ratio?

What is an angle?

What can you do with percentages?

How do you estimate?

Learn a new chart

**YEAR 8**

When can you use bar modelling?

explain the sequence

Can you convert between measurements?

Rounding

How many transformations can you perform?

Do you know the differences between the averages?

Connecting fractions, decimals and percentages

How are symbols used?

Properties of shapes

How are your basics?

Can you use directed numbers?

What do you know? - baseline assessment

**YEAR 7**

When are symbols replaced by numbers?

What can you draw with maths equipment?

Putting numbers in order

What are number facts?

welcome
