

Geography Y10

Term	1	2	3	4	5	6
Topic	The Changing Economic World 1. Development Gap	The Changing Economic World 2. Nigeria 3. The Changing UK economy	Hot Deserts	The Urban World	Coastal Landscapes in the UK	Fieldwork
Detail	Different ways of classifying parts of the world according to their level of economic development and quality of life. Different economic and social measures of development: gross national income (GNI) per head, birth and death rates, infant mortality, life expectancy, people per doctor, literacy rates, access to	A case study of one LIC or NEE to illustrate: •• the location and importance of the country, regionally and globally •• the wider political, social, cultural and environmental context within which the country is placed •• the changing industrial structure. The balance between	The physical characteristics of a hot desert. The interdependence of climate, water, soils, plants, animals and people. How plants and animals adapt to the physical conditions. Issues related to biodiversity.	The global pattern of urban change. Urban trends in different parts of the world including HICs and LICs. Factors affecting the rate of urbanisation – migration (push–pull theory), natural increase. The emergence of megacities.	Wave types and characteristics. Coastal processes: •• weathering processes – mechanical, chemical •• mass movement – sliding, slumping and rock falls •• erosion – hydraulic power, abrasion and attrition •• transportation – longshore drift •• deposition – why sediment is deposited in coastal areas.	Suitable question for geographical enquiry Selecting, measuring and recording data appropriate to the chosen enquiry Selecting appropriate ways
Grade 8-9	To be able to analyse and a range of points while making connections between issues such as the variation in economic development and the strategies existing for reducing the development gap.	To be able to analyse and a range of points while making connections between issues such as social and political change and the effectiveness of strategies for reducing the development gap.	To be able to analyse and a range of points while making connections between issues desertification and adaptation.	To be able to analyse and a range of points while making connections between issues. For example the growth of the world's population and economic development.	To be able to analyse and a range of points while making connections between issues such as coastal processes and management of their impact on the human environment.	To be able to analyse the majority of points about appropriate data collection methods for coastal investigations while assessing the reliability of the results. Connections should be made between result of own fieldwork and the implications for coastal management.
Grade 6-7	To be able to explain and analyse the majority of points in relation to global variation in economic development and quality of life. They should also be able to analyse the strategies for reducing the global development gap.	To be able to explain and analyse a case study of Nigeria as an NEE experiencing rapid economic growth leading to significant social and environmental changes.	To be able to explain and analyse the majority of points in relation to the distinctive characteristics of hot desert systems and the opportunities and challenges posed.	To be able to explain and analyse the majority of points relating to the worlds growing urban population and the opportunities and challenges that this provides.	To be able to explain and analyse the majority of points in relation to the physical processes that create coastal landforms and landscapes. Management strategies should be analysed in full at this stage.	To be able to explain and analyse the majority of points about appropriate data collection methods for coastal investigations while assessing the reliability of the results
Grade 5	to be able to explain in detail, most aspects of global variation in economic development and quality of life. They should also be able to explain the strategies for reducing the global development gap.	to be able to explain in detail, most aspects of Nigeria as an NEE experiencing rapid economic growth leading to significant social and environmental changes.	to be able to explain in detail the distinctive characteristics of hot desert systems and the opportunities and challenges posed.	to be able to explain in detail, most aspects of relating to the worlds growing urban population and the opportunities and challenges that this provides.	to be able to explain in detail, most aspects of the physical processes that create coastal landforms and landscapes. Management strategies should be explained in full at this stage.	to be able to explain in detail how to choose the correct data collection methods. They must demonstrate presentation techniques and use them to explain their results in detail.
Grade 4	To be able to give detailed descriptions of and begin to explain aspects of global variation in economic development and quality of life. They should also be able to describe the strategies for reducing the global development gap.	To be able to give detailed descriptions of and begin to explain aspects of the rapid economic development of Nigeria	To be able to give detailed descriptions of and begin to explain aspects of distinctive characteristics of hot desert systems and the opportunities and challenges posed.	To be able to give detailed descriptions of and begin to explain aspects of relating to the worlds growing urban population and the opportunities and challenges that this provides.	To be able to give detailed descriptions of and begin to explain aspects of the physical processes that create coastal landforms and landscapes. Management strategies should be described in full at this stage.	To be able to give detailed descriptions of and begin to explain how to choose the correct data collection methods. They must demonstrate presentation techniques and use them to describe their results in detail while giving some basic explanation.
Grade 2-3	To have some knowledge of and to describe some aspects global variation in economic development and quality of life.	To have some knowledge of and to describe some aspects of the rapid economic development of Nigeria.	To have some knowledge of and to describe some aspects distinctive characteristics of hot desert systems and the opportunities and challenges posed.	To have some knowledge of and to describe some aspects relating to the worlds growing urban population and the opportunities and challenges that this provides.	To have some knowledge of and to describe some aspects of the physical processes that create coastal landforms and landscapes.	To have some knowledge of and to describe some aspects of choosing the correct data collection methods. They must demonstrate basic presentation techniques and use them to describe their results.
